

NOVEMBER IS LUNG CANCER AWARENESS MONTH

Radon Exposure can lead to Lung Cancer *

- Radon is the second leading cause of Lung Cancer after cigarette smoking
- Long term Radon exposure can lead to Lung tissue being damaged
- Radon is the number 1 cause of Lung Cancer for non-smokers

Test your Home for Radon

Radon is a colorless, odorless,
tasteless radioactive gas.

Testing your home for Radon will allow
you to know your level of exposure.

The Tribal Healthy Homes Project
provides free Radon Test kits for your
home - Scan the QR for more
information

*For more information on the Health Risk of Radon, visit the
<https://www.epa.gov/radon/health-risk-radon>
